

Dear Ms Giannaros:

I am writing in support for dissection choice bill, HB 6329.

This will give students a choice. Many doctors have said it is not necessary to dissect animals, many students do not dissect when training to be doctors or veterinarians. There are many alternative realistic models and computer programs that work. Many children who use these alternatives outperform their peers who learn by dissecting. Alternative choices are cheaper for schools other than animals and can be reused.

Please give children a choice.

Respectfully,
Lynn Printy
